Palash Srivastava

Head of Platform | DevSecOps & AI Infrastructure | Site Reliability

Portfolio | New York | srivastavapalash | srivastavapalash0@gmail.com | +1 (571) 236-0145

Hands-on platform and reliability leader with 9+ years scaling cloud infrastructure, strengthening security, and optimizing costs.

Experience

CONSTRAFOR | New York, USA

Head of Platform

June 2025 – Present

- Reduced monthly AWS spend by **50%** by restructuring services and rightsizing cloud infrastructure while preserving platform capacity
- Drove **SOC 2 Type II** readiness through platform hardening and Terraform-managed AWS and GitHub governance with auditable access controls
- Initiated AI-assisted PR risk assessment across multiple repos, enabling risk-based reviews and visibility into delivery performance through DevLake and PostHog
- Owned **25+** vendor contracts and a **$50–70K quarterly budget**, aligning renewals and usage forecasts with finance for predictable engineering spend

Senior DevOps Engineer

June 2024 – May 2025

- Re-architected the core backend to deliver **5x traffic capacity**
- Led the GitLab-to-GitHub migration and release workflow redesign, achieving a **70% reduction in deployment time** with multi-environment promotion gates
- Standardized delivery with **40+** reusable GitHub Actions workflows and enabled PR-based review environments with automated Cypress testing
- Delivered Cru AI agent infrastructure on AWS Lambda and Step Functions, enabling versioned releases and on-demand rollback

CERTIK | Sr. Platform Engineer

Nov 2023 – May 2024 | New York, USA

- Conducted AWS service review, achieving a **15% reduction** in overall costs
- Automated cleanup of Datadog monitors and synthetic tests
- Established automated onboarding for Datadog teams
- Designed reusable GitHub Actions workflows for adoption across teams
- Implemented CI/CD pipelines for multiple products using GitHub Actions
- Remediated AWS EC2 security findings to strengthen security and compliance
- Negotiated vendor contracts for cost efficiency and service continuity

TS IMAGINE | Cloud DevOps Engineer | Software Engineer

Jan 2022 – Nov 2023 | New York, USA

- Centralized monitoring for risk systems using Prometheus and Grafana
- Led end-of-day VaR cloud POC: **20% higher efficiency** and **30% lower costs**
- Automated end-to-end risk product deployments with Jenkins pipelines and agents
- Contributed infrastructure design documentation for migration to GCP
- Designed and executed real-time VaR parity tests across GCP and on-premises
- Migrated DEV and PPE environments from Docker Swarm to GKE

TS IMAGINE (IMAGINE SOFTWARE) | Technical Operations Engineer

Sept 2019 – Dec 2021 | New York, USA

- Redesigned production for site awareness, reducing disaster recovery failover by **70%**
- Managed incident response and service recovery against SLA and SLO targets
- Implemented proactive monitoring, alerting, and trend analysis using Python
- Administered Docker Swarm deployments across development, UAT, and production
- Diagnosed production incidents and addressed root causes to prevent future outages

FIS | Programmer Analyst

May 2019 - Sept 2019 | San Diego, USA

- Designed and developed data models, reports and interfaces using Oracle PL/SQL
- Collaborated with clients and gathered requirements for ACBS suite development

FIS | Derivatives Analyst

Apr 2017 - May 2019 | Jersey City, USA

- Scripted alert monitoring on ITRS Geneos to maintain the stability of servers
- Provided L2/L3 support for application breakdowns thus ensuring trading stability

Skills

Cloud & Infrastructure:
AWS • GCP • Kubernetes • Docker • Cloud Migrations • Scalable Infrastructure

DevSecOps & Automation:
CI/CD • GitHub Actions • Jenkins • Terraform • Python • OpenSearch • Spinnaker

Leadership & FinOps:
Team Building • Mentorship • OKR Planning • FinOps • Budgeting • Vendor Management

Security & Compliance:
SOC 2 • IAM • RBAC • Cloud Security • Vulnerability Management • Secrets Management

Observability & Monitoring:
Datadog • Prometheus • Grafana • ELK Stack • Incident Management • ITIL • SLOs

Education

UNIVERSITY OF ALABAMA IN HUNTSVILLE

Master's in Computer Science

Aug'15 - Dec'16 | Huntsville, Alabama

GPA: 3.9 / 4.0

Projects

Bonjour IoT Discovery

Designed framework for service discovery in IOT based app using Bonjour API.

Certifications

Microsoft Technology Associate
Microsoft Certified Professional

Leadership

Platform roadmap and quarterly OKR planning.

Graduate mentorship and career development.
Hiring and team development.
